loup.broussard@outlook.com

Toulouse / Nîmes (France)
Car and motorcycle licence, own car

LinkedIn: Loup Broussard
GitHub: loupbsd
Website: loupbsd.github.io

Languages

French: native
English: B2
Italian: beginner / A1
German: school-level / A2

Skills

- Programming: Python (proficient); Java, JavaScript (used in internship and projects); C, Ada (basic)
- Rust: currently learning (personal project: CHIP-8 emulator)
- Mobile & embedded: Android Studio, NFC, app lifecycle and threads, accessibility (TalkBack)
- Data & signal: NumPy, SciPy (FFT), Pandas, Matplotlib
- Tools: Git, GitLab, GitHub Pages, Notion
- Web & databases: basic SQL, HTML, CSS

Interests

Rugby (15 years): national youth level; now in the Toulouse INP team, French Grandes Écoles Championship (XV and sevens)

Music: live coding (Strudel); in charge of sound for student union parties at La Prépa des INP

Motorsport: F1, MotoGP, Rally
Mechanics: cars and motorcycles
Formula Student: N7RT

LOUP BROUSSARD

Seeking a **6 to 12-week internship (June – August 2027) in embedded systems, data, IoT, software or networks.**

Computer Science & Telecoms Engineering Student

Education

ENSEEIHT – Computer Science & Telecoms (1Y) | 2026 – 2029

- Systems: computer architecture, operating systems, C, imperative (Ada) and object-oriented (Java) programming
- Signals & data: signal processing, telecommunications, control systems, data analysis, machine learning, scientific computing
- Networks: Internet, local area networks
- Applied maths: measure theory and integration, probability, statistics, optimisation

La Prépa des INP – Toulouse | 2024 – 2026

- Two-year integrated preparatory programme: maths, physics, chemistry, computer science (Python, algorithms)

French Baccalauréat with highest honours | 2024

Lycée Philippe Lamour – Computer Science, Maths, Physics-Chemistry

Work Experience

Android Developer Intern | May – June 2026

IRIT, Toulouse Computer Science Research Institute – ELIPSE team

- Took over an Android app (Java, XML) linking physical objects to audio descriptions via NFC tags, for visually impaired pupils
- Stabilised NFC reading (software lock, thread management), ending repeated scans that interrupted user input
- Designed and built the AccessibilityUtils module independently (Speech-to-Text input, TalkBack), making the app usable with a screen reader
- Improved search in the local database; tested on a physical device and validated the app on site with SESSAD and IJA professionals

Labourer (Masonry) | Summer 2022

Carles Maçonnerie, France

- Carried out structural and roofing work as part of a site team, on 6 a.m.–2 p.m. shifts
- Followed strict health and safety procedures

Projects

- “Recreating a piano with code”: group project (5 students, La Prépa des INP, 2026)
- Spectral analysis (FFT) of three recorded piano octaves in Python (NumPy, SciPy, Matplotlib)
- My part: recreating tracks through live coding (Strudel, JavaScript), with samples hosted on GitHub Pages
